Customize your BizInsight Suite. Create your own connection to your data. You know what you need to make your ERP system even more productive. Now, you can design and create it, all inside Excel, and be working in minutes, not days. You're in charge.

Practical

- Leverage existing spreadsheets and Excel queries
- Test and check as you create and build your custom app
- Create ad-hoc reports utilizing drag-and-drop functions / reports

Useful

- Create custom drag & drop functions and data sets in Minutes
- Add Custom Excel-based parameters to filter your data

Productive

- Create custom functions that speed workflow and reporting
- In-memory caching eliminates redundant, large data files
- Up and running in minutes, not hours
